CALCE Webinar Series – Issues on Reliability of Electronic Products and Systems

Electronics continue to be on the leading edge of technology development. Engineers that develop or use electronic systems technologies must be able to synthesize interdisciplinary knowledge from many diverse sources: electrical, mechanical, thermal, materials, manufacturing, and business. In addition, they must be able to effectively communicate (verbally and in writing), as well as be adept at working on teams.

Rapid advances in electronic products and systems require special efforts to educate the technical workforce. These special efforts include the use of systematic just-in-time transfer of state-of-the-art knowledge derived from the latest research results.

To meet these challenges, the Center for Advanced Life Cycle Engineering is presenting web-based seminars on issues related to reliability of electronic products and systems. Webinars are held once a month (except March and October). Engineers may register for a single web seminar or a series of 10 webinars. Engineers may also register for continuing education credit.

For list of upcoming webinars, please visit

Registration Form

CALCE Webinar Series – Issues on Reliability of Electronic Products and Systems

___ Single - $300.00 per registration

___ Series (10 webinars over a 12 month period) - $2500 per registration

___ Continuing Education Credit Registration (1 credit – 10 webinars) - $50 per registration
